

RETURNING SAMPLES

When you return samples, please place trays in a box (not oversized) and, if well insulated, 1 cold pack will suffice. This will reduce shipping costs. Also, please include the completed Testing Submission Form (in a ziplock bag to prevent the form from getting damaged or unreadable from moisture). Please feel free to contact us with shipping questions or advice on best methods for your area.

The best shipment options are through UPS (Next Day Air), DHL (Next Day Air by 10:30 am), or Fedex (Priority Overnight). These methods are a little more costly, but we will receive the tubes the next day by 10:30 am and in good condition. Second-Day services are an economical option as long as samples are well-insulated and kept cool.

Depending on your location, UPS, DHL, or Fedex Ground shipment may be an option and will be much more economical. Please call us and we will be glad to check the best shipment option for you.

If you have any questions please do not hesitate to call at 405-607-4522.
